About the Recharge Scheme

The Scooter Recharge Scheme enables mobility scooter and electric wheelchair users to conveniently recharge batteries at various public locations when out and about in the community.

Recharge stickers are displayed on the windows of participating businesses so you can easily find them. Recharge stickers are also placed above or near the power points that are ready to use.

Further details about the scheme including locations of recharge points can be found online at

www.rechargescheme.org.au

Disclaimer

Recharge points are provided as a community service. The operation of the recharge facility and security of mobility aids remains the user's responsibility. Motorised mobility aids may remain on the premises for recharging at the owner's sole expense and risk. The Councils listed on this brochure accept no liability whatsoever for any loss or damage to any motorised mobility aid and/or its contents while being recharged at any of the listed recharge points, including loss or damage by theft, negligent acts by others or inclement weather.
